**HOUSE REPUBLICANS SHARE PLAYBOOK FOR ECONOMIC SUCCESS**

**Tallahassee, Fla.**—Ahead of the big game this weekend, Florida House Republicans are providing a sneak peek at their own playbook—one for economic success. Enacting policies based on the conservative principles of lower taxes, balanced budgets, fiscal responsibility, reduced debt and increased opportunity has spurred economic growth in Florida and put our state back on the right track.

Compared to just one year ago, Florida has seen a net gain of over 50,000 jobs and unemployment is down 1.9 percentage points to 8% (its lowest level in four years). And this year, our economy has been forecasted to grow at its fastest pace in 7 years. By continuing to call plays that build upon the foundation of these conservative values, we will keep scoring touchdowns for Florida in the Jobs Bowl and help more Floridians get back to work.

“The good policies we have implemented in Florida over the last few years are helping small businesses and entrepreneurs in our state thrive again, and as a result, our economy is improving and more Floridians are getting back to work,” said House Majority Leader Steve Precourt. “Florida is headed in the right direction and to carry on the positive growth we have seen, we will continue to encourage and support economic growth, innovation and opportunity in our state. Republicans have the playbook for economic success and we are dedicated to getting Florida over the goal line.”
